World Bank Project (2007-16)

'e-Velanmai' Approach of Extension through Android app in Tamil Nadu

Dr. C. KARTHIKEYAN

Professor (Ag. Extn.) & Principal Investigator
Tamil Nadu Agricultural University
karthikeyanextn@yahoo.com

EXTENSION ISSUE

- Appropriate scientific advice is not reaching farming community effectively in a timely manner.
- How best the available extension manpower can be used effectively & efficiently?

CONCEPT OF e-VELANMAI (e-Agriculture)

 It is a combination of personal & ICT based, demand driven, participatory and sustainable extension approach to provide appropriate and timely agro advisory services by Agrl. experts to the farmers through **Field Extension Coordinator on need basis.**

Action research process

- Pilot testing: 2007 2008 (Public Model)
 2008 2011 (Paid Model)
- Sub Basins: Palar, Aliyar and Varaghanadhi

- Upscaling: 2011 2012 (19 sub basins)
 2012 2013 (26 sub basins)
- Adoption: 2015-16 (100 Blocks) / 13 districts

Technology transfer process in e-Velanmai (2007-2013)

Name of the farmer / Village	:	Mr.V.Dharmasekaran Thaligaividuthi village
Crop	:	Coconut
Crop area	:	4.5 ac
Problem identified	:	Button shedding in coconut
Advice given	:	Root feeding of TNAU coconut
		tonic @ one packet (200 ml) per
		tree
Benefits perceived	:	Additional income of Rs.75/tree

Name of the farmer / Village	:	Mr.G.Rukumani, Nagal village
Crop	:	Jasmine
Crop area	:	0.50 ac
Problem identified	:	Bud worm larva pest
Advice given	:	Profenofos 50 EC @ 2 ml/lit
Benefit perceived	:	740 kg added yield was realised

LESSONS LEARNT

- 1. Appropriate farm specific and timely agricultural extension advices can be offered by the agricultural experts to solve the farmer's problems based on the crop status images sent from the field using ICT tools.
- 2. Farmers will come forward to pay a nominal fee based on their farm size for accessing quality and timely extension advices.
- 3. The existing manpower (BTM/ATM) of ATMA can be involved effectively and efficiently to transfer agril. advices to farmers through e-Velanmai.
- 4. Combination of Personal + ICT based approach of extension is effective and timely.

Adoption of e-Velanmai

GoTN has approved the 'e-Velanmai" extension approach for implementation in 100 blocks of Tamil Nadu through the extension officials (BTM/ATM) of the Department of Agriculture.

G.O.4(D). No. 11 Dt.15.05.2014 Agriculture (WD2) Department

Technology Transfer through Android app (2015-16)

BTM/ATM Visits farmers field

Tries to identify and confirm the problem

Confirmed (Level I)

Send SMS Advices to farmers mobile directly

Farmer receives SMS advice and adopts in consultation with BTM/ATM

BTM/ATM makes follow up visits to farmers field

Not confirmed

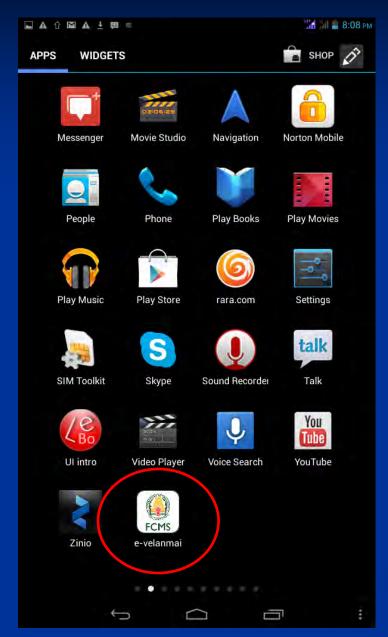

(Level II)

Collects crop status image and sends to TNAU expert

TNAU experts analyse and send SMS advice to Extn.
Officer and farmers directly

HOW TO DO e-Velanmai using Android app?

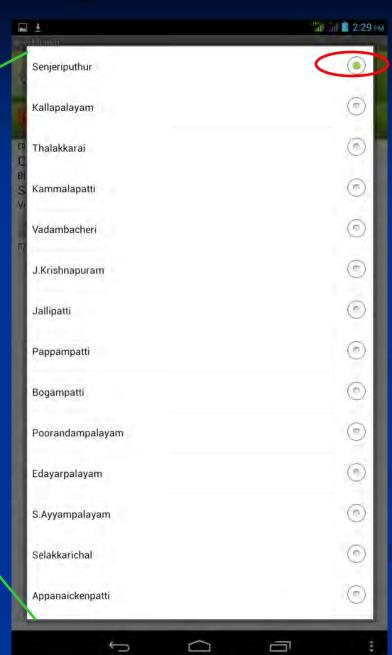

Click the e-Velanmai app Enter the User Name and Password

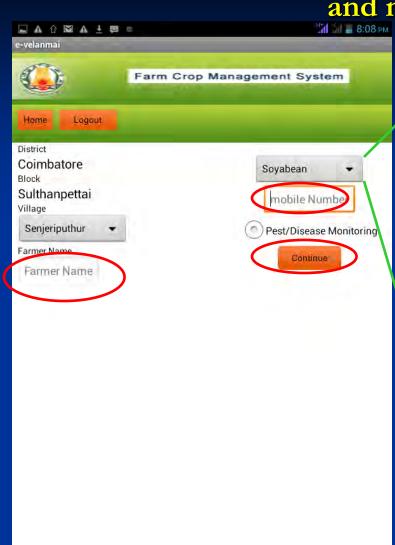

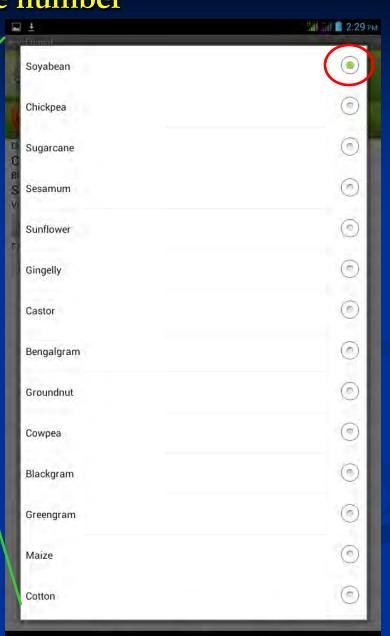

3. Select the target village in the Block

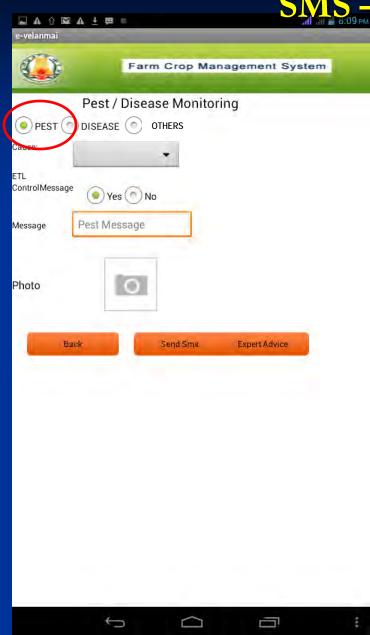

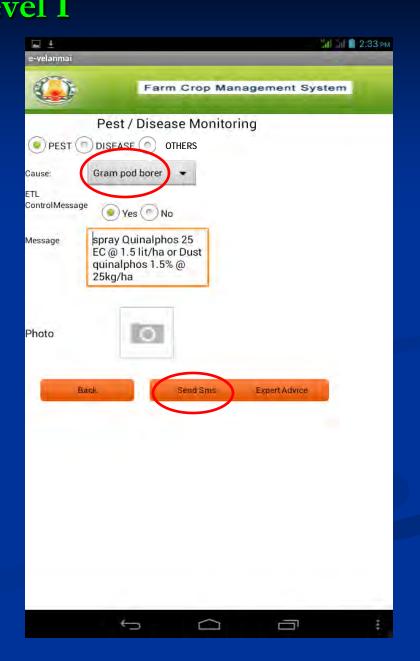

4. Select the crop then enter the farmer name and mobile number

5. Identify pest/disease. Advice pops up and click Send SMS – Level I

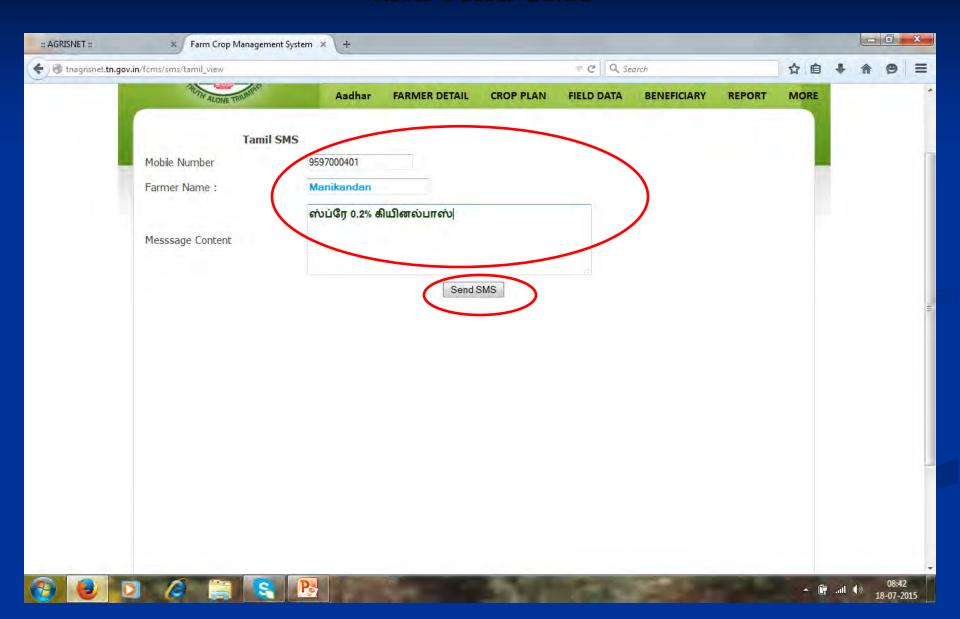

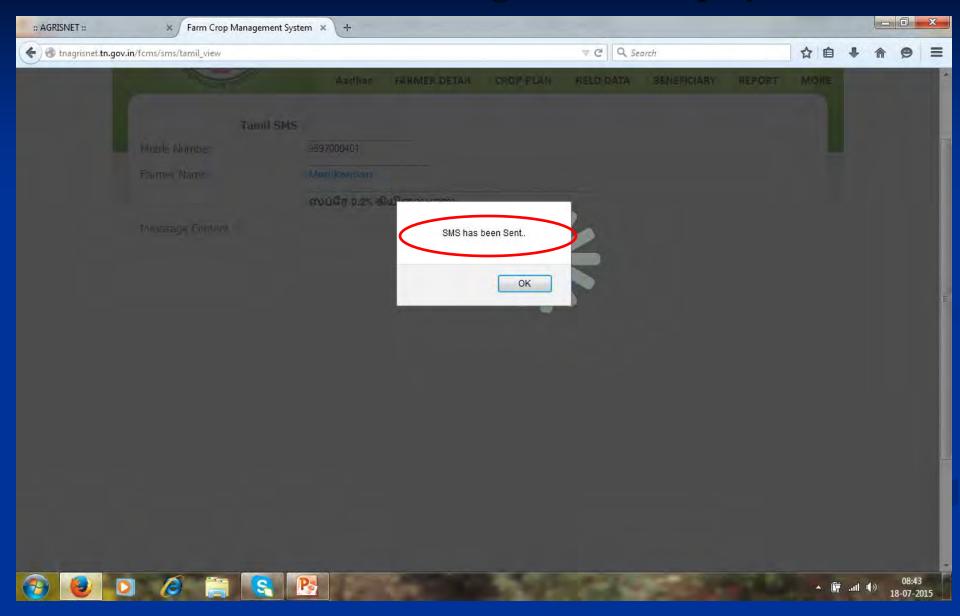

6. To send SMS in Tamil, click 'MORE'

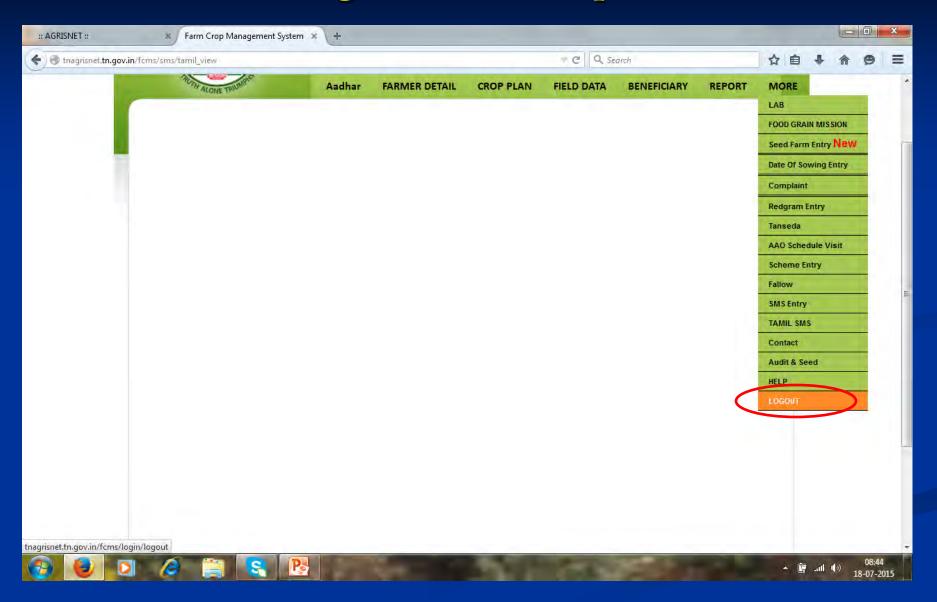

7. Enter the advice in transliterated version and send SMS

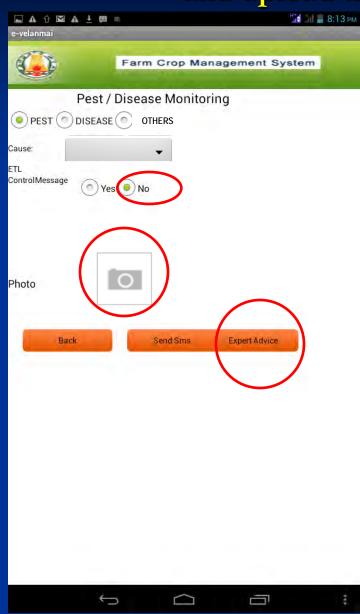

Confirmation message will be displayed

8. 'Logout' to end the process

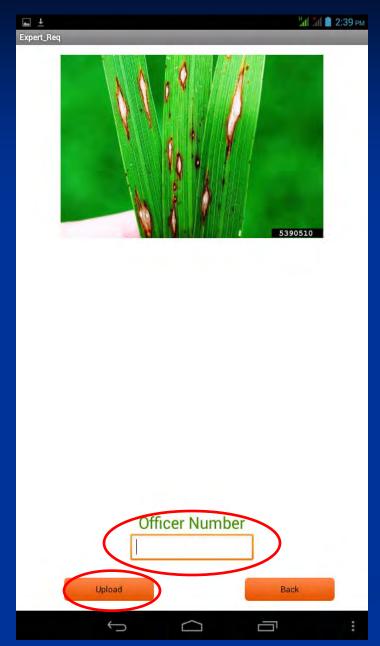

9. Unable to identify the pest, click No and upload the symptom from gallery

10. Enter the Extension officer's mobile number and up load

Expert at Level I can close the app

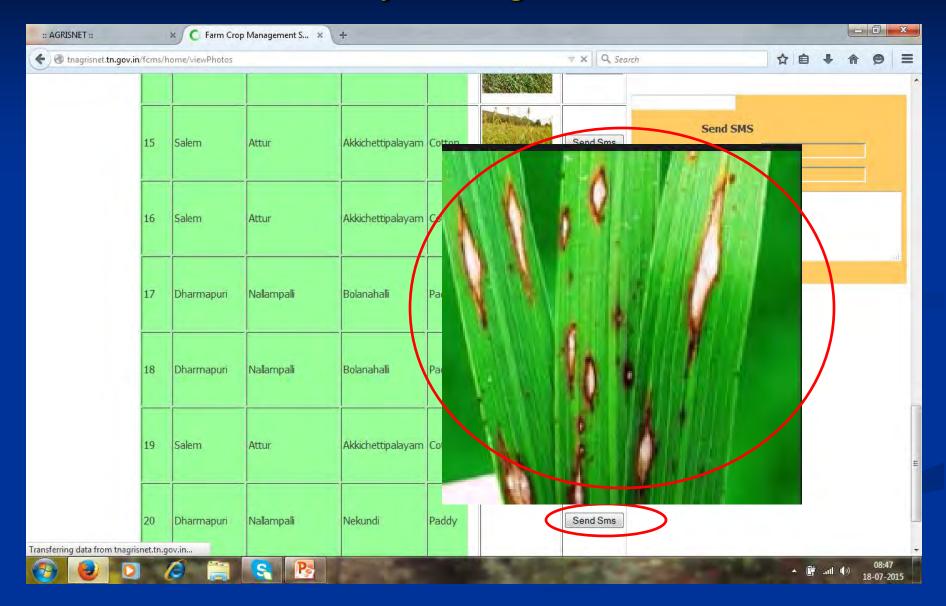

1. Expert at level II- To login by entering username and PW

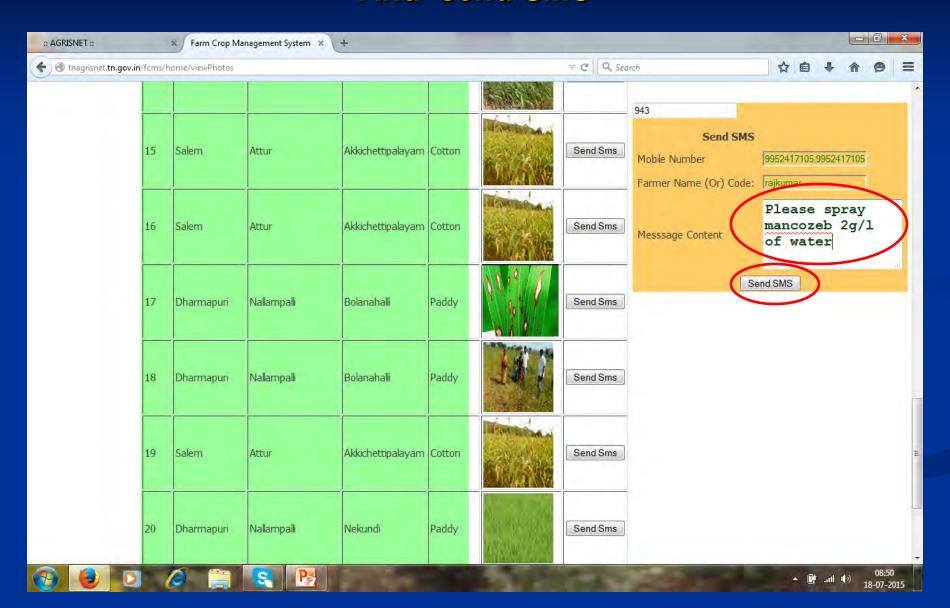

2. Click e-Velanmai to diagnose the crop images

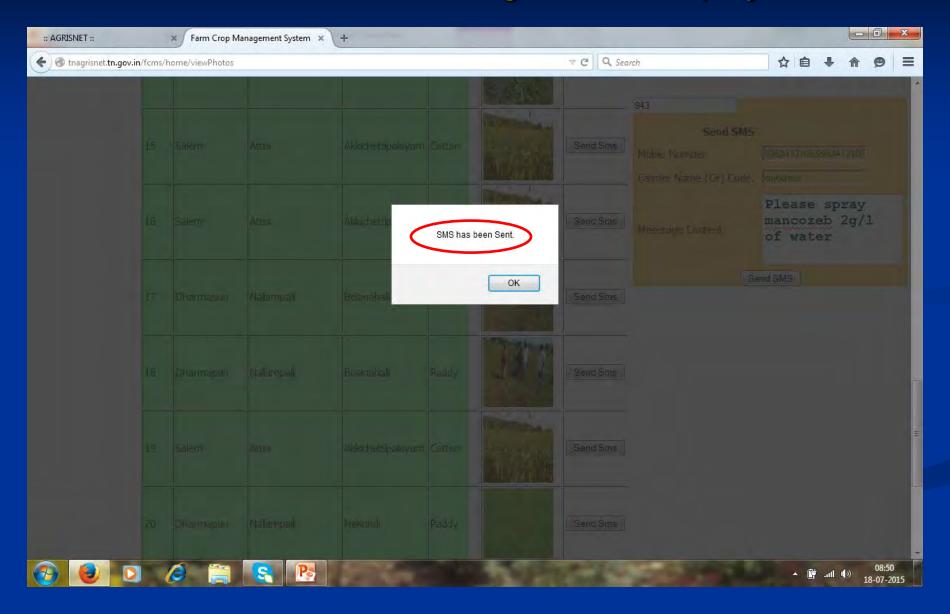

3. Observe the bigger image and take decision to give advice by clicking send SMS

4. Enter advice in the message content And 'send SMS'

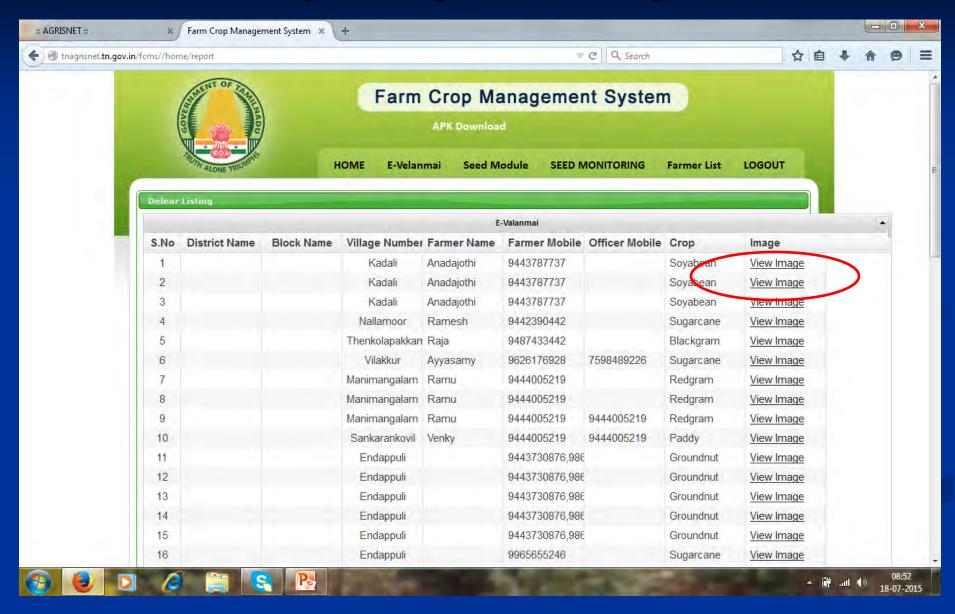

5. Confirmation message will be displayed

6. Download the report on the FCMS home page

7. Report on the advices offered will be generated by clicking the view image

8. 'Logout' to end the process at level-II

Conclusion

- e-Velanmai is a feasible and replicable model of extension in India and developing countries.
- Low cost, user friendly and very effective model in terms of disseminating timely and appropriate advice to the farmers.

Conviction and adoption of technologies by farmers is ensured to achieve enhanced productivity and farm income.
